

**PETROSIVE 800****Product Description :**

PETROSIVE 800® is an emulsion resin based on acrylic monomers.

Application :

- Coldseal
- Laminate adhesive
- Apply on metallized, OPP and ...

Characteristics :

- Excellent adhesion
- High flexibility

Specifications :

Solid content-----	51 - 52 %
Viscosity-----	100-300 cP
Ph-----	8-10
MFFT (Minimum film formation temperature) -----	0 °c
Density -----	1.07
Remaining monomer -----	Less than % 0.3

Packing

In 200kg drums and other packaging according to customer.

Storage Conditions

Storage conditions can be stored up to six months. The closed barrel and prevent frostbite sure.

Ecological aspects

This resin is not a danger to the environment. Contact with skin causes irritation and inflammation is not.
